

Motorola Applauds Senator Ensign for Addressing the Need to Move the US to the Broadband Forefront

WASHINGTON, DC – 29 July 2005 – Motorola, Inc. (NYSE:MOT) today applauded Senator Ensign (R-NV) for his demonstrated focus on promoting competition and innovation in the telecommunications marketplace. The Senator introduced the Broadband Consumer Choice Act of 2005 which is designed to reduce obstacles to technological innovation and expansion.

"Working under the leadership of Senators Stevens and Inouye to advance reforms critical to the high-tech industry, this rewrite process will make our economy stronger and boost consumer choices. Senator Ensign has clearly addressed the need to strengthen the US role in the global telecom space, and breaking down the regulatory differences between voice, video and data services for IP technologies is part of that plan," said [Mike Kennedy](#), senior vice president, Americas Country Management and director of global government relations, Motorola, Inc.

About Motorola

Motorola is a Fortune 100 global communications leader that provides seamless mobility products and solutions across broadband, embedded systems and wireless networks. In your home, auto, workplace and all spaces in between, seamless mobility means you can reach the people, things and information you need, anywhere, anytime. Seamless mobility harnesses the power of technology convergence and enables smarter, faster, cost-effective and flexible communication. Motorola had sales of US \$31.3 billion in 2004.
